

For Immediate Release

NorthSeas Announces E-mail Archiving Solutions Based on Intel Server Systems

January 7, 2008 (Ottawa, Canada) – NorthSeas AMT (*NorthSeas*), the pioneer of e-mail archiving software for appliance solutions, today announced that the Intel® Server Systems SR1530AH and SR1530AHLX are newly certified hardware platforms for the NorthSeas Guard E/N family of products.

“We are absolutely delighted to offer customers and partners the option of a NorthSeas e-mail archiving appliance on the latest Intel system”, says Stephen P. Spence, President and CEO of NorthSeas. “We are extremely impressed with the technology and very pleased with the support and participation of Intel.”

The Intel® Server System SR1530AH/SR1530AHLX is the latest in Intel’s rack-optimized system solutions. It is scalable and affordable, and the unique, shorter chassis depth is a perfect fit for the space-constrained environments where appliance solutions are often installed. With over 10,000 hours of testing and validation, these Intel® Server Systems provide the uptime and serviceability that a business-critical application like messaging requires.

“At Intel, we are differentiated by our partner solutions,” says David L Brown, Marketing Director, Enterprise Platforms and Service Division, Intel Corporation. “World-class applications like NorthSeas e-mail archiving, help us solidify our position as the market leading supplier of critical business systems”.

“We have been very impressed with the NorthSeas Guard E/N appliance on Intel hardware,” says Ronald Monette, IT Administrator of Rhodes and Williams Insurance Limited in Ottawa, Canada, an early customer of this new hardware and software combination. “The ability to stay on top of our e-mail correspondence with customers and brokers, provided by this system, is a valuable asset for us in a very competitive insurance industry.”

About NorthSeas

NorthSeas was founded in 2003 on the principle that business critical information solutions do not need to be complicated and expensive. The company has emerged as a leading supplier of simple, open, effective and vendor-independent e-mail archiving solutions for the small-midsize enterprise market. NorthSeas technology is available through distributors and resellers in eighteen countries in Europe, Asia, Africa, Oceania, and North America, as well as OEM partners, who incorporate NorthSeas technology into their own solutions. www.NorthSeasAMT.com

About Intel

Intel, the world leader in silicon innovation, develops technologies, products and initiatives to continually advance how people work and live. Additional information about Intel is available at www.intel.com/pressroom and blogs.intel.com.
