

For Immediate Release

NorthSeas Adds Unique Full-Text Indexing and more to its E-Mail Archiving Appliances with Firmware Release 2.3

Ottawa, ON -- January 18, 2005 -- NorthSeas AMT (NorthSeas), pioneer of the e-mail archiving appliance, is pleased to announce the release of Version 2.3 of its NorthSeas Archiving firmware, providing full-text searching, remote management, and logging and reporting to its two popular e-mail archiving appliance solutions – the NorthSeas Guard E/N and the NorthSeas Gal E/N.

Message Content Searching – Using innovative inverted-indexing technology, NorthSeas archiving appliances now offer e-mail users, as well as compliance officers and records managers, the ability to quickly search for content contained in archived messages.

Remote Software Upgrades – NorthSeas customers can now quickly and automatically install new firmware releases and patches as soon as they are released.

Logging and Reporting – NorthSeas' appliances now offer logging of system activities and viewable usage reports.

Attachment Searching – NorthSeas users can now also search based on commonly used attachment criteria including name and type of attachment.

NorthSeas e-mail appliances are easy to install, use and maintain. The innovative appliance-based NorthSeas Search and Replay™ application gives users access to a virtually unlimited repository of their e-mail messages within seconds (without the need for third-party software), while at the same time reducing mail-server quotas on the server.
