

## NorthSeas Launches the Newest in its Fleet of E-mail Archiving Appliances

MILTON KEYNES, England -- September 7, 2005 – NorthSeas AMT (NorthSeas), the pioneer of the e-mail archiving appliance, today introduced the newest product in their line of simple and effective e-mail storage appliances at a gathering of NorthSeas UK channel partners. The NorthSeas Gal E/N (pronounced *Galleon*) could be considered the big brother to the popular NorthSeas Guard E/N; the product that proved vendor-neutral e-mail archiving was possible and could be deployed as an appliance solution.

The Gal E/N is being launched in the UK and Holland in response to the growing enthusiasm in Europe towards “NorthSeas Archiving” - the vendor-independent, appliance-simple approach to providing any messaging system with unlimited storage by setting up standard network storage as a user-accessible corporate message repository.

“With the release of our first product, NorthSeas Archiving has grown in popularity amongst businesses of all sizes,” says Stephen P. Spence, President and CEO of NorthSeas. “By adding significant throughput and redundancy, without sacrificing simplicity or affordability, the Gal E/N is an e-mail solution that big business and SMBs can now share.”

The NorthSeas Gal E/N runs the same NorthSeas Archiving application as the Guard E/N, but archives up to 5 times faster and has increased the size of the onboard message index to over 500 million messages, suitable for even the largest of enterprises. The Gal E/N includes 1 GB of system memory and offers redundancy through its dual 800 MHz processors and separate network connections. As an appliance, the Gal E/N is an e-mail archiving solution that is easy to maintain and does not require any third-party software, application integration or user training.

The NorthSeas Gal E/N can be ordered immediately and the company will begin shipping the product in October 2005.

### About NorthSeas AMT

NorthSeas AMT was founded in 2003 to provide the global marketplace with simple and effective e-mail management solutions. NorthSeas has recently qualified for the Top Tech Companies 25 Up and Comers, a prestigious list of companies expected to be future technology leaders. NorthSeas products are sold through a network of authorized resellers, distributors and OEM partners in thirteen countries, supporting North America, United Kingdom, continental Europe, Australia, Africa, and Asia-Pacific regions. NorthSeas is based in Ottawa, the high-tech capital of Canada. [www.NorthSeasAMT.com](http://www.NorthSeasAMT.com) |
