NorthSeas White Paper Calls for Open E-mail Storage

Ottawa, Canada -- September 8, 2005 – NorthSeas AMT (NorthSeas), the pioneer of the e-mail archiving appliance, has released its latest white paper, titled "Toward an Infinite Message Store – An Argument for Open E-mail Storage".

This non-product specific paper examines the e-mail paradox; the situation that most organizations now face where e-mail usage is too high for most e-mail servers to handle yet for compliance, legal and knowledge management reasons, deleting e-mail is no longer a viable business option.

The author of the paper, Stephen P. Spence, describes messaging as the last of the closed systems and describes the architectural 'Layers of Dependence' that often leaves the customer to choose between functionality and openness. Spence proposes an Open E-mail Storage model that provides options for message stores that are vendor-neutral, scalable, secure, and manageable.

Both the paper and an Executive Summary are available for download at no charge from <http://www.NorthSeasAMT.com>.

About NorthSeas AMT

NorthSeas AMT was founded in 2003 to provide the global marketplace with simple and effective e-mail management solutions. NorthSeas has recently qualified for the Top Tech Companies 25 Up and Comers, a prestigious list of companies expected to be future technology leaders. NorthSeas products are sold through a network of authorized resellers, distributors and OEM partners in thirteen different countries, supporting North America, the United Kingdom, continental Europe, Australia, Africa, and Asia-Pacific regions. NorthSeas is based in Ottawa, the high-tech capital of Canada.
