

Job Posting - January 22, 2007

Intermediate/Senior Programmer

NorthSeas AMT is a small Kanata-based start-up poised for potential leadership in the explosive new market for e-mail archiving solutions.

We are currently looking for an **Intermediate/Senior Programmer** to assume a critically important role in the company. In addition to the qualifications listed below, the successful candidate must be a problem solver by nature, and have the ability to work confidently under pressure in a fast-paced, ever-changing environment, while successfully managing multiple priorities and consistently meeting customer expectations and commitments.

Requirements:

- 3-5 years experience as a successful and innovative programmer
- Team Leader experience
- Ability and confidence to solve problems independently
- Reputation for producing good code and working with little supervision
- Experience preparing good technical documentation
- Strong written and verbal communications skills

Technologies and Protocols:

- PHP and C
- FreeBSD – preferably including kernel modification
- E-mail Messaging – preferably qMail
- Apache
- PostGresQL database
- LDAP
- Storage protocols – CIFS, NFS and iSCSI

In addition, the following experience would be beneficial:

- Embedded systems
- Experience with network storage systems
- Customer service experience

Only Ottawa area candidates will be considered.

Please send your resume to jobs@northseasamt.com. Only candidates selected for interview will be contacted.
